* The Penguins and Farm Units are both integrated theme units that address nearly all areas of study, including literacy, math, science, social studies, and art. As integrated themes, they require 17 and 18 classroom days, respectively. Since many teachers are no longer at liberty to teach in such an integrated way, both units have been reconfigured to lay out over 30 math periods each. The re-worked versions of both units can be found on the Math Learning Center web site, Grade 1 Support Page under Supplements as Supplement Sets A10 and A11.
