

Linking Mathematics & Literature, Grades 2–5

When provided with a variety of tools, teachers are best able to promote deeper understanding of underlying mathematical skills and concepts. One strong yet often under utilized tool in mathematics is children's literature. In this 10-hour course for second through fifth grade teachers, participants will:

- Familiarize themselves with a wide variety of math-related children's literature
- Explore mathematical concepts
- Consider visual models in various texts and in related hands-on activities
- Celebrate the unique role that literature plays in helping students to discover and enjoy math
- Participate in and prepare lessons to use in their own classrooms.

ADDITIONAL INFORMATION

Text & Materials

Participant brings tool kit. Details sent upon registration.

Instructor

Cynthia Hockman-Chupp has been teaching from the Bridges curriculum for the last five years and served as a field tester for Bridges Grade 5. She has taught across grades K–12 and currently works as a curriculum writer and consultant.

How can we help?
