

| Word                   | Definition   | Examples  |
|------------------------|--|---|
| <b>column</b>          | a vertical field in a chart, table, or graph   |                                        |
| <b>coordinate</b>      | the vertical or horizontal position of a point on a grid (Together the coordinates show the exact location of the point.)                      |                                        |
| <b>cube</b>            | a 3-D shape with 6 square faces  |                                        |
| <b>cup</b>             | 1 cup = 8 fluid ounces<br>1 cup = 16 tablespoons<br>16 cups = 1 gallon   |                                        |
| <b>cylinder</b>        | a 3-D shape with 2 circular faces of the same size   |                                        |
| <b>difference</b>      | the answer to a subtraction problem; the result of subtracting one number from another; the amount by which one number is greater than another | $8 - 3 = 5$   |
| <b>hexagon</b>         | a 2-D shape with 6 sides (The sides can all be the same length or different lengths.)  |                                      |
| <b>key/legend</b>      | the part of a map or graph that explains its symbols   | <p>Number of Fun Run Laps We Ran</p>  |
| <b>number sentence</b> | an equation or inequality  | $3 + 4 = 7$ $5 - 3 = 2$ $4 + 5 > 8$   |
| <b>pint</b>            | 1 pint = 16 fluid ounces<br>1 pint = 2 cups<br>1 gallon = 8 pints<br><br>(Half and half often comes in pint cartons.)                          |                                      |

|                                 |   |  |
|---------------------------------|---|--|
| <p><b>quart</b></p>             | <p>1 quart = 32 fluid ounces<br/>                     1 quart = 4 cups<br/>                     1 quart = 2 pints<br/>                     1 gallon = 4 quarts</p> <p>(Milk often comes in quart-size cartons.)</p> |   |
| <p><b>rectangular prism</b></p> | <p>a 3-D shape with 6 faces that are all rectangles<br/>                     (A cube is a rectangular prism with 6 faces that are all squares.)</p>   |   |
| <p><b>regrouping</b></p>        | <p>forming into a new group, as when five pennies are traded for a nickel or when 10 ones are traded for a ten</p>  |  $\begin{array}{r} 1 \\ 36 \\ + 19 \\ \hline 55 \end{array}$ |
| <p><b>rhombus</b></p>           | <p>a 2-D shape with 4 equal sides<br/>                     (A square is a rhombus with 4 right angles.)</p>   |   |
| <p><b>row</b></p>               | <p>a horizontal field in a chart, table, or graph</p>   |    |
| <p><b>sphere</b></p>            | <p>a ball shape in which every point on the outside is the same distance from the center<br/>                     (An egg shape is not a sphere.)</p>   |   |
| <p><b>sum</b></p>               | <p>the result of adding 2 or more numbers; the answer to an addition problem</p>  | $3 + 1 = 4$ $3 + 3 + 7 = 13$   |
| <p><b>trapezoid</b></p>         | <p>a 2-D, 4-sided shape with only 1 pair of parallel sides (Parallel means they would never cross even if they went on forever.)</p>  |    |
| <p><b>triangle</b></p>          | <p>a 2-D shape with 3 sides</p>   |    |
