## TEKS CORRELATIONS FOR BRIDGES INTERVENTION

## Volume 6 - Operations: Base Ten Operations: Multiplication \& Division of Multi-Digit Numbers

|  | TEKS | Major Instructional Targets | Recommended Instruction Range for Tier 2 Intervention |
| :---: | :---: | :---: | :---: |
|  | Multiplicative Comparisons |  |  |
|  | 3.4F | Fluently multiply with products to 100 | - Early to mid grade 4 |
|  | $\begin{aligned} & 3.5 \mathrm{C} \\ & 4.5 \mathrm{~A} \end{aligned}$ | Interpret and make multiplicative comparisons |  |
|  | 4.5A | Solve story problems involving a multiplicative comparison |  |
|  | 4.4CD | Multiply a 2-digit whole number by a 1-digit whole number using strategies based on place value |  |
|  | Multiplying One-Digit Numbers by Ten and Multiples of Ten |  |  |
|  | 4.5A | Make a comparison statement to match a multiplication equation | - Early to mid grade 4 |
|  | 4.5A | Write a multiplication equation to represent a verbal statement of a multiplicative comparison |  |
|  | 4.5A | Solve story problems involving a multiplicative comparison using multiplication |  |
|  | 4.2A | Demonstrate an understanding that in a multi-digit number, each digit represents 10 times what it represents in the place to its right |  |
|  | 4.4CD | Multiply 1- and 2-digit numbers by 1- and 2-digit numbers using strategies based on place value |  |
| $\begin{aligned} & m \\ & \underset{1}{2} \\ & \stackrel{1}{0} \\ & \stackrel{0}{\Sigma} \end{aligned}$ | One- by Two-Digit Multiplication, Part 1 |  |  |
|  | 4.5A | Make a comparison statement to match a multiplication equation | - Mid grade 4 <br> - Very early grade 5 |
|  | 4.2A | Demonstrate an understanding that in a multi-digit number, each digit represents 10 times what it represents in the place to its right |  |
|  | 4.4CD | Multiply 1- and 2-digit numbers by 1- and 2-digit numbers using strategies based on place value and the properties of operations |  |
|  | One- by Two-Digit Multiplication, Part 2 |  |  |
|  | 4.2A | Demonstrate an understanding that in a multi-digit number, each digit represents 10 times what it represents in the place to its right | - Mid grade 4 <br> - Very early grade 5 |
|  | 4.4CD | Multiply 1-digit numbers by 2-digit numbers using strategies based on place value and the properties of operations |  |
|  | 4.4CD | Use rectangular arrays and equations to explain strategies for multiplying with multi-digit numbers |  |
|  | $4.5 C D$ | Apply the area formula for a rectangle to solve a problem |  |
| $\begin{aligned} & \text { م } \\ & \underset{1}{3} \\ & \stackrel{0}{0} \\ & \mathbf{0} \end{aligned}$ | Multiplying Two-Digit Multiples of Ten |  |  |
|  | 4.5A | Interpret and make multiplicative comparisons; write a multiplication equation to represent a statement of a multiplicative comparison | - Mid grade 4 <br> - Early grade 5 |
|  | 4.4CD | Demonstrate an understanding that in a multi-digit number, each digit represents 10 times what it represents in the place to its right |  |
|  | 4.4CD | Multiply 1- and 2-digit numbers by 2-digit numbers using strategies based on place value and the properties of operations |  |

|  | TEKS | Major Instructional Targets | Recommended Instruction Range for Tier 2 Intervention |
| :---: | :---: | :---: | :---: |
| $\begin{aligned} & \circ \\ & \stackrel{\rightharpoonup}{1} \\ & \stackrel{0}{0} \\ & \stackrel{0}{2} \end{aligned}$ | Two-by Two-Digit Multiplication, Part 1 |  |  |
|  | 4.4CD | Multiply 1- and 2-digit numbers by 2-digit numbers using strategies based on place value and the properties of operations | - Mid to late grade 4 <br> - Early grade 5 |
|  | 4.4CD | Use rectangular arrays, area models, and equations to explain strategies for multiplying with multi-digit numbers |  |
|  | $4.5 C D$ | Apply the area formula for a rectangle to solve a problem |  |
| $\begin{aligned} & \mathrm{N} \\ & \mathrm{u} \\ & \stackrel{\rightharpoonup}{2} \\ & \stackrel{0}{\mathrm{O}} \end{aligned}$ | Two-by Two-Digit Multiplication, Part 2 |  |  |
|  | Supports 3.4F, 4.4C | Multiply multiples of 10 by single digits mentally | - Mid to late grade 4 <br> - Early grade 5 |
|  | 4.4CD | Multiply two 2-digit numbers using strategies based on place value and the properties of operations |  |
|  | 4.4CD | Use area models and equations to explain strategies for multiplying with multi-digit numbers |  |
| The Standard Multiplication Algorithm |  |  |  |
|  | 4.4CD | Multiply two multiples of 10 mentally | - Mid grade 5 |
|  | 4.4CD | Multiply two 2-digit numbers using strategies based on place value and the properties of operations |  |
|  | 4.4CD | Use area models and equations to explain strategies for multiplying with multi-digit numbers |  |
|  | $\begin{aligned} & \text { Supports } \\ & 5.3 B \end{aligned}$ | Use rounding and front-ending to estimate the results of multiplying two 2-digit numbers |  |
|  | 5.3B | Multiply two 2-digit numbers using the standard multiplication algorithm |  |
| The Array Model for Division |  |  |  |
| $\begin{aligned} & a \\ & \underset{3}{u} \\ & \stackrel{0}{0} \\ & \stackrel{0}{2} \end{aligned}$ | 4.4CD | Multiply a 2-digit number by a 1-digit number, or two 2-digit numbers using strategies based on place value and properties of operations | - Late grade 4 <br> - Mid grade 5 |
|  | 4.4EF | Use rectangular arrays to model and solve problems that involve dividing a 2-digit number by a 1-digit number |  |
|  | 4.4EF | Use rectangular arrays to explain strategies for dividing a multi-digit number by a 1 -digit number |  |
|  | 5.3B | Multiply two 2-digit numbers using the standard multiplication algorithm |  |
|  | 5.3C | Divide a 3-digit number by a 2-digit number using strategies based on place value and the relationship between multiplication and division |  |
|  | 5.3C | Use rectangular arrays to explain strategies for dividing a 3-digit number by a 2-digit number |  |
|  | Building \& Sketching Division Arrays |  |  |
|  | $\begin{aligned} & \text { 4.4CD, } \\ & 5.3 \mathrm{~B} \end{aligned}$ | Use strategies based on place value and properties of operations, including the standard algorithm, to multiply multi-digit numbers | - Late grade 4 <br> - Mid grade 5 |
|  | $\begin{aligned} & 4.2 \mathrm{EF}, \\ & 5.3 \mathrm{C} \end{aligned}$ | Divide 2- and 3-digit numbers by 1- and 2-digit numbers using strategies based on place value, the properties of operations, and the relationship between multiplication and division |  |
|  | $\begin{aligned} & 4.2 \mathrm{EF}, \\ & 5.3 \mathrm{C} \end{aligned}$ | Use rectangular arrays, area models, and equations to explain strategies for multi-digit division, including problems that result in remainders |  |

|  | TEKS | Major Instructional Targets | Recommended Instruction Range for Tier 2 Intervention |
| :---: | :---: | :---: | :---: |
|  | Introducing \& Developing the Scaffold Algorithm for Division |  |  |
|  | $\begin{aligned} & \text { 4.4CD, } \\ & 5.3 \mathrm{~B} \end{aligned}$ | Use strategies based on place value and properties of operations, including the standard algorithm, to multiply multi-digit numbers | - Mid to late grade 5 |
|  | $\begin{aligned} & 4.2 \mathrm{EF}, \\ & 5.3 \mathrm{C} \end{aligned}$ | Divide 2- and 3-digit numbers by 1-and 2-digit numbers using strategies based on place value, the properties of operations, and the relationship between multiplication and division |  |
|  | $\begin{aligned} & 4.2 E F \\ & 5.3 C \end{aligned}$ | Use area models and equations to explain strategies for multi-digit division, including problems that result in remainders |  |
|  | Practicing the Scaffold Algorithm |  |  |
|  | $\begin{aligned} & 4.4 C D, \\ & 5.3 \mathrm{~B} \end{aligned}$ | Use strategies based on place value and properties of operations, including the standard algorithm, to multiply multi-digit numbers | - Mid to late grade 5 |
|  | $\begin{aligned} & 4.2 \mathrm{EF} \\ & 5.3 \mathrm{C} \end{aligned}$ | Divide 2- and 3-digit numbers by 1- and 2-digit numbers using strategies based on place value, the properties of operations, and the relationship between multiplication and division |  |
|  | $\begin{aligned} & 4.2 \mathrm{EF} \\ & 5.3 \mathrm{C} \end{aligned}$ | Use area models and equations to explain strategies for multi-digit division, including problems that result in remainders |  |
