

# Bridges in Mathematics Second Edition

## Minnesota Alignment Guide

---

Bridges in Mathematics Second Edition includes Number Corner, a self-contained supplemental program that complements Bridges unit work with 20-minute daily workouts providing practice with a wide variety of skills. As noted in this guide, Number Corner is a requirement for addressing the standards. Work Places, game and activity stations that give students additional practice with key skills, also offer opportunities for teachers to differentiate and extend instruction.

### **Grades K–2**

Bridges meets and exceeds all the Minnesota Math Essentials. This guide includes suggestions educators can use to determine students' proficiency with skills developed in the unit work.

### **Grades 3–5**

Bridges meets almost all of the Minnesota Math Essentials. Additional materials described in this guide address the remaining content. Modifications to accommodate the additional instruction are included.
