**This story is excerpted from the read-aloud books included in the Bridges in Mathematics Pre-K curriculum. This math-rich collection features theme-based counting and numeral recognition, sequencing, shapes and locations, and very early addition and subtraction. For more information about these books, including how to order the full printed collection of nine titles, visit [store.mathlearningcenter.org/bridges-2nd-edition/2bpkread.asp](http://store.mathlearningcenter.org/bridges-2nd-edition/2bpkread.asp).**

The Math Learning Center is a nonprofit organization serving the education community. Our mission is to inspire and enable individuals to discover and develop their mathematical confidence and ability. We offer innovative and standards-based professional development, curriculum, materials, and resources to support learning and teaching. To find out more, visit us at [www.mathlearningcenter.org](http://www.mathlearningcenter.org).

It's a  
Butterfly's  
Life

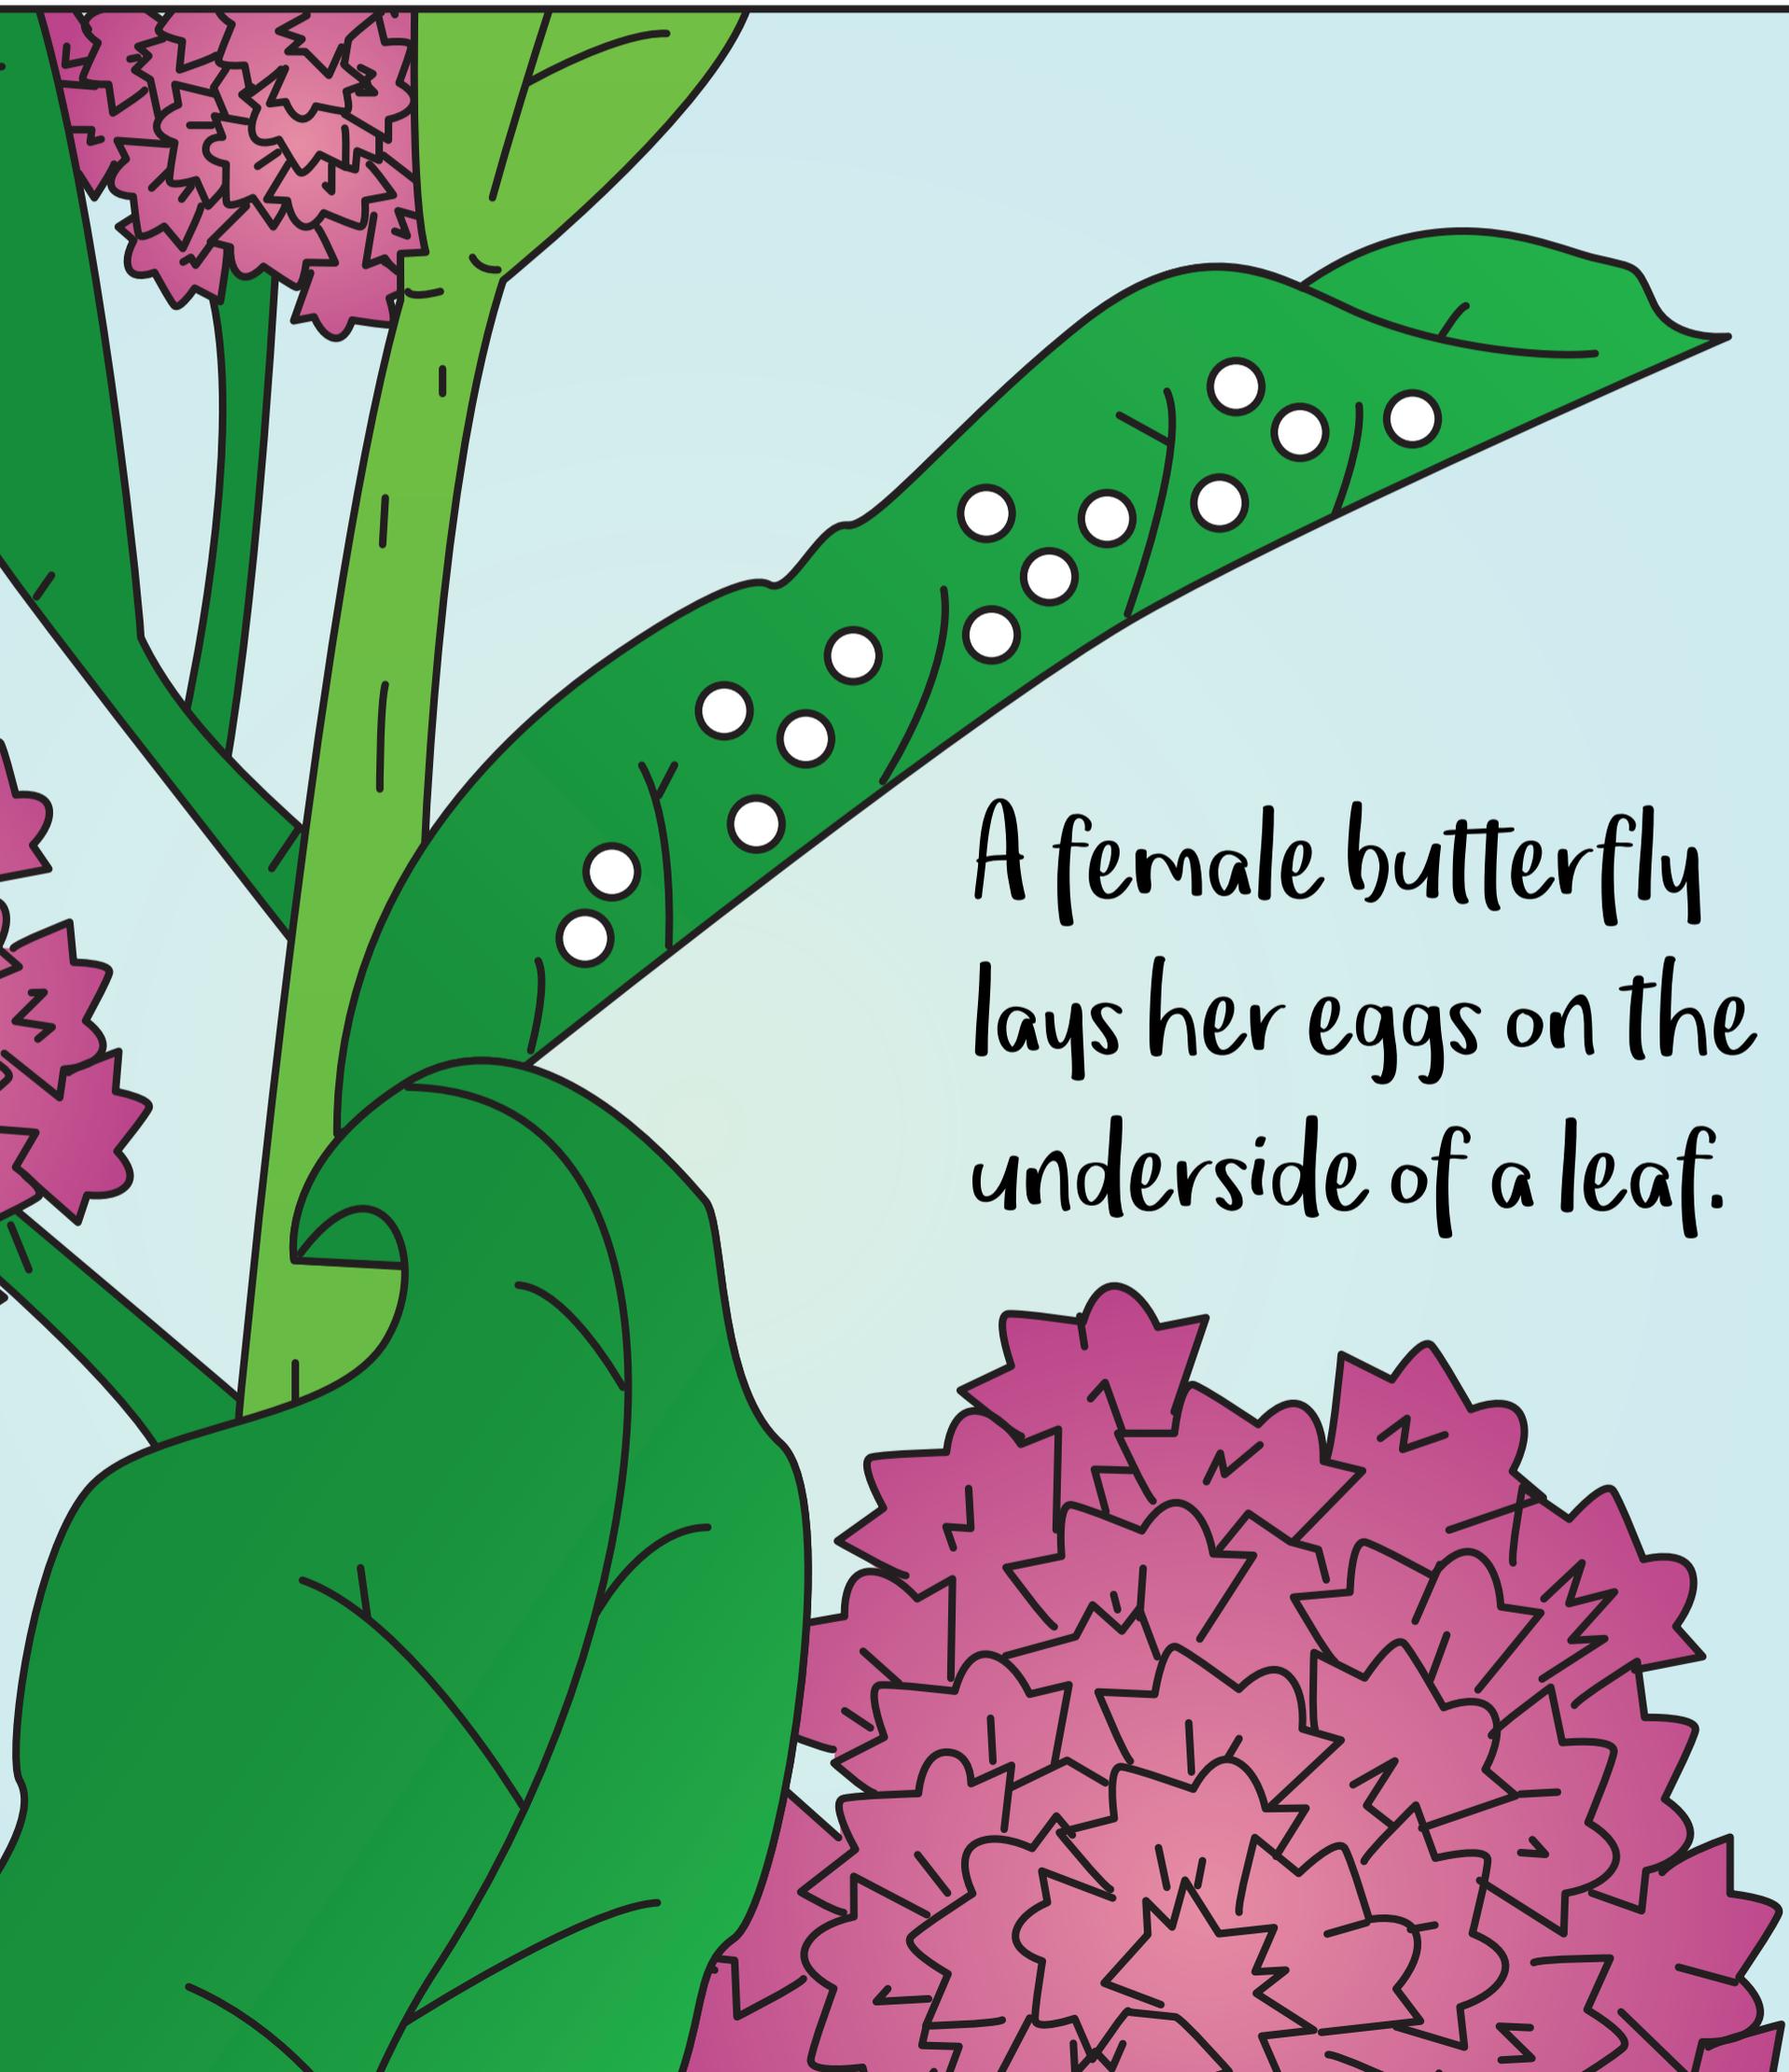

*Story by Allyn Fisher · Art by Amber Cooper & Tyson Smith*

1

EGG

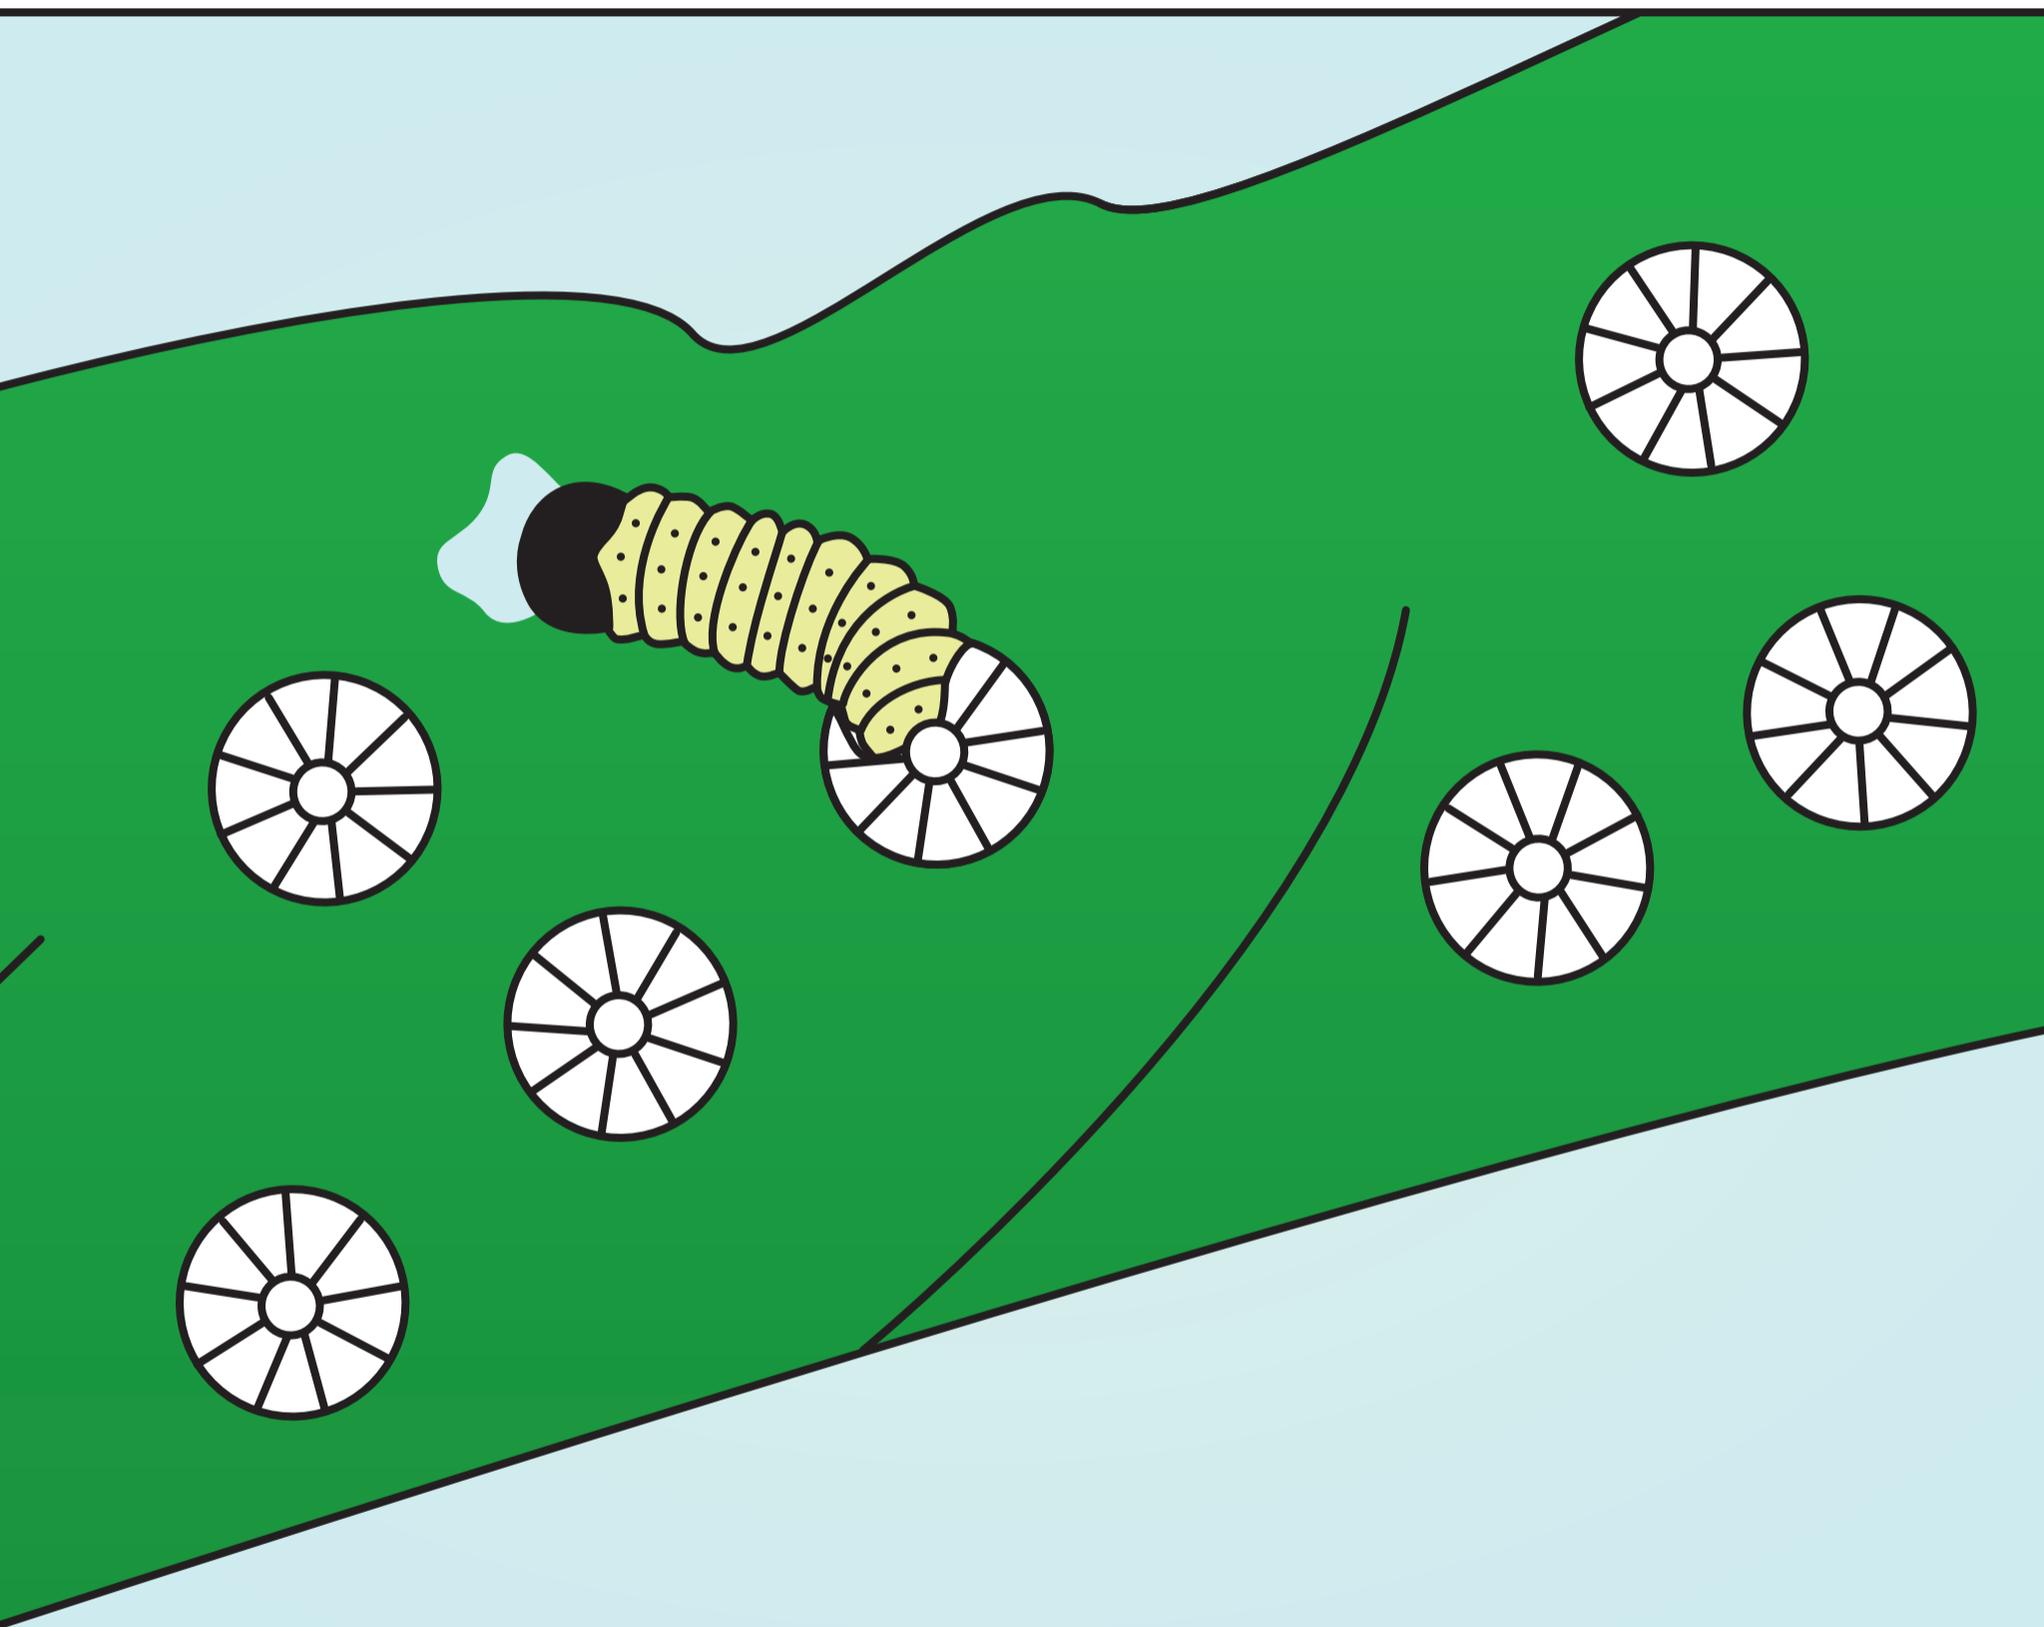

FIRST

A female butterfly  
lays her eggs on the  
underside of a leaf.

2

## TINY CATERPILLAR SECOND

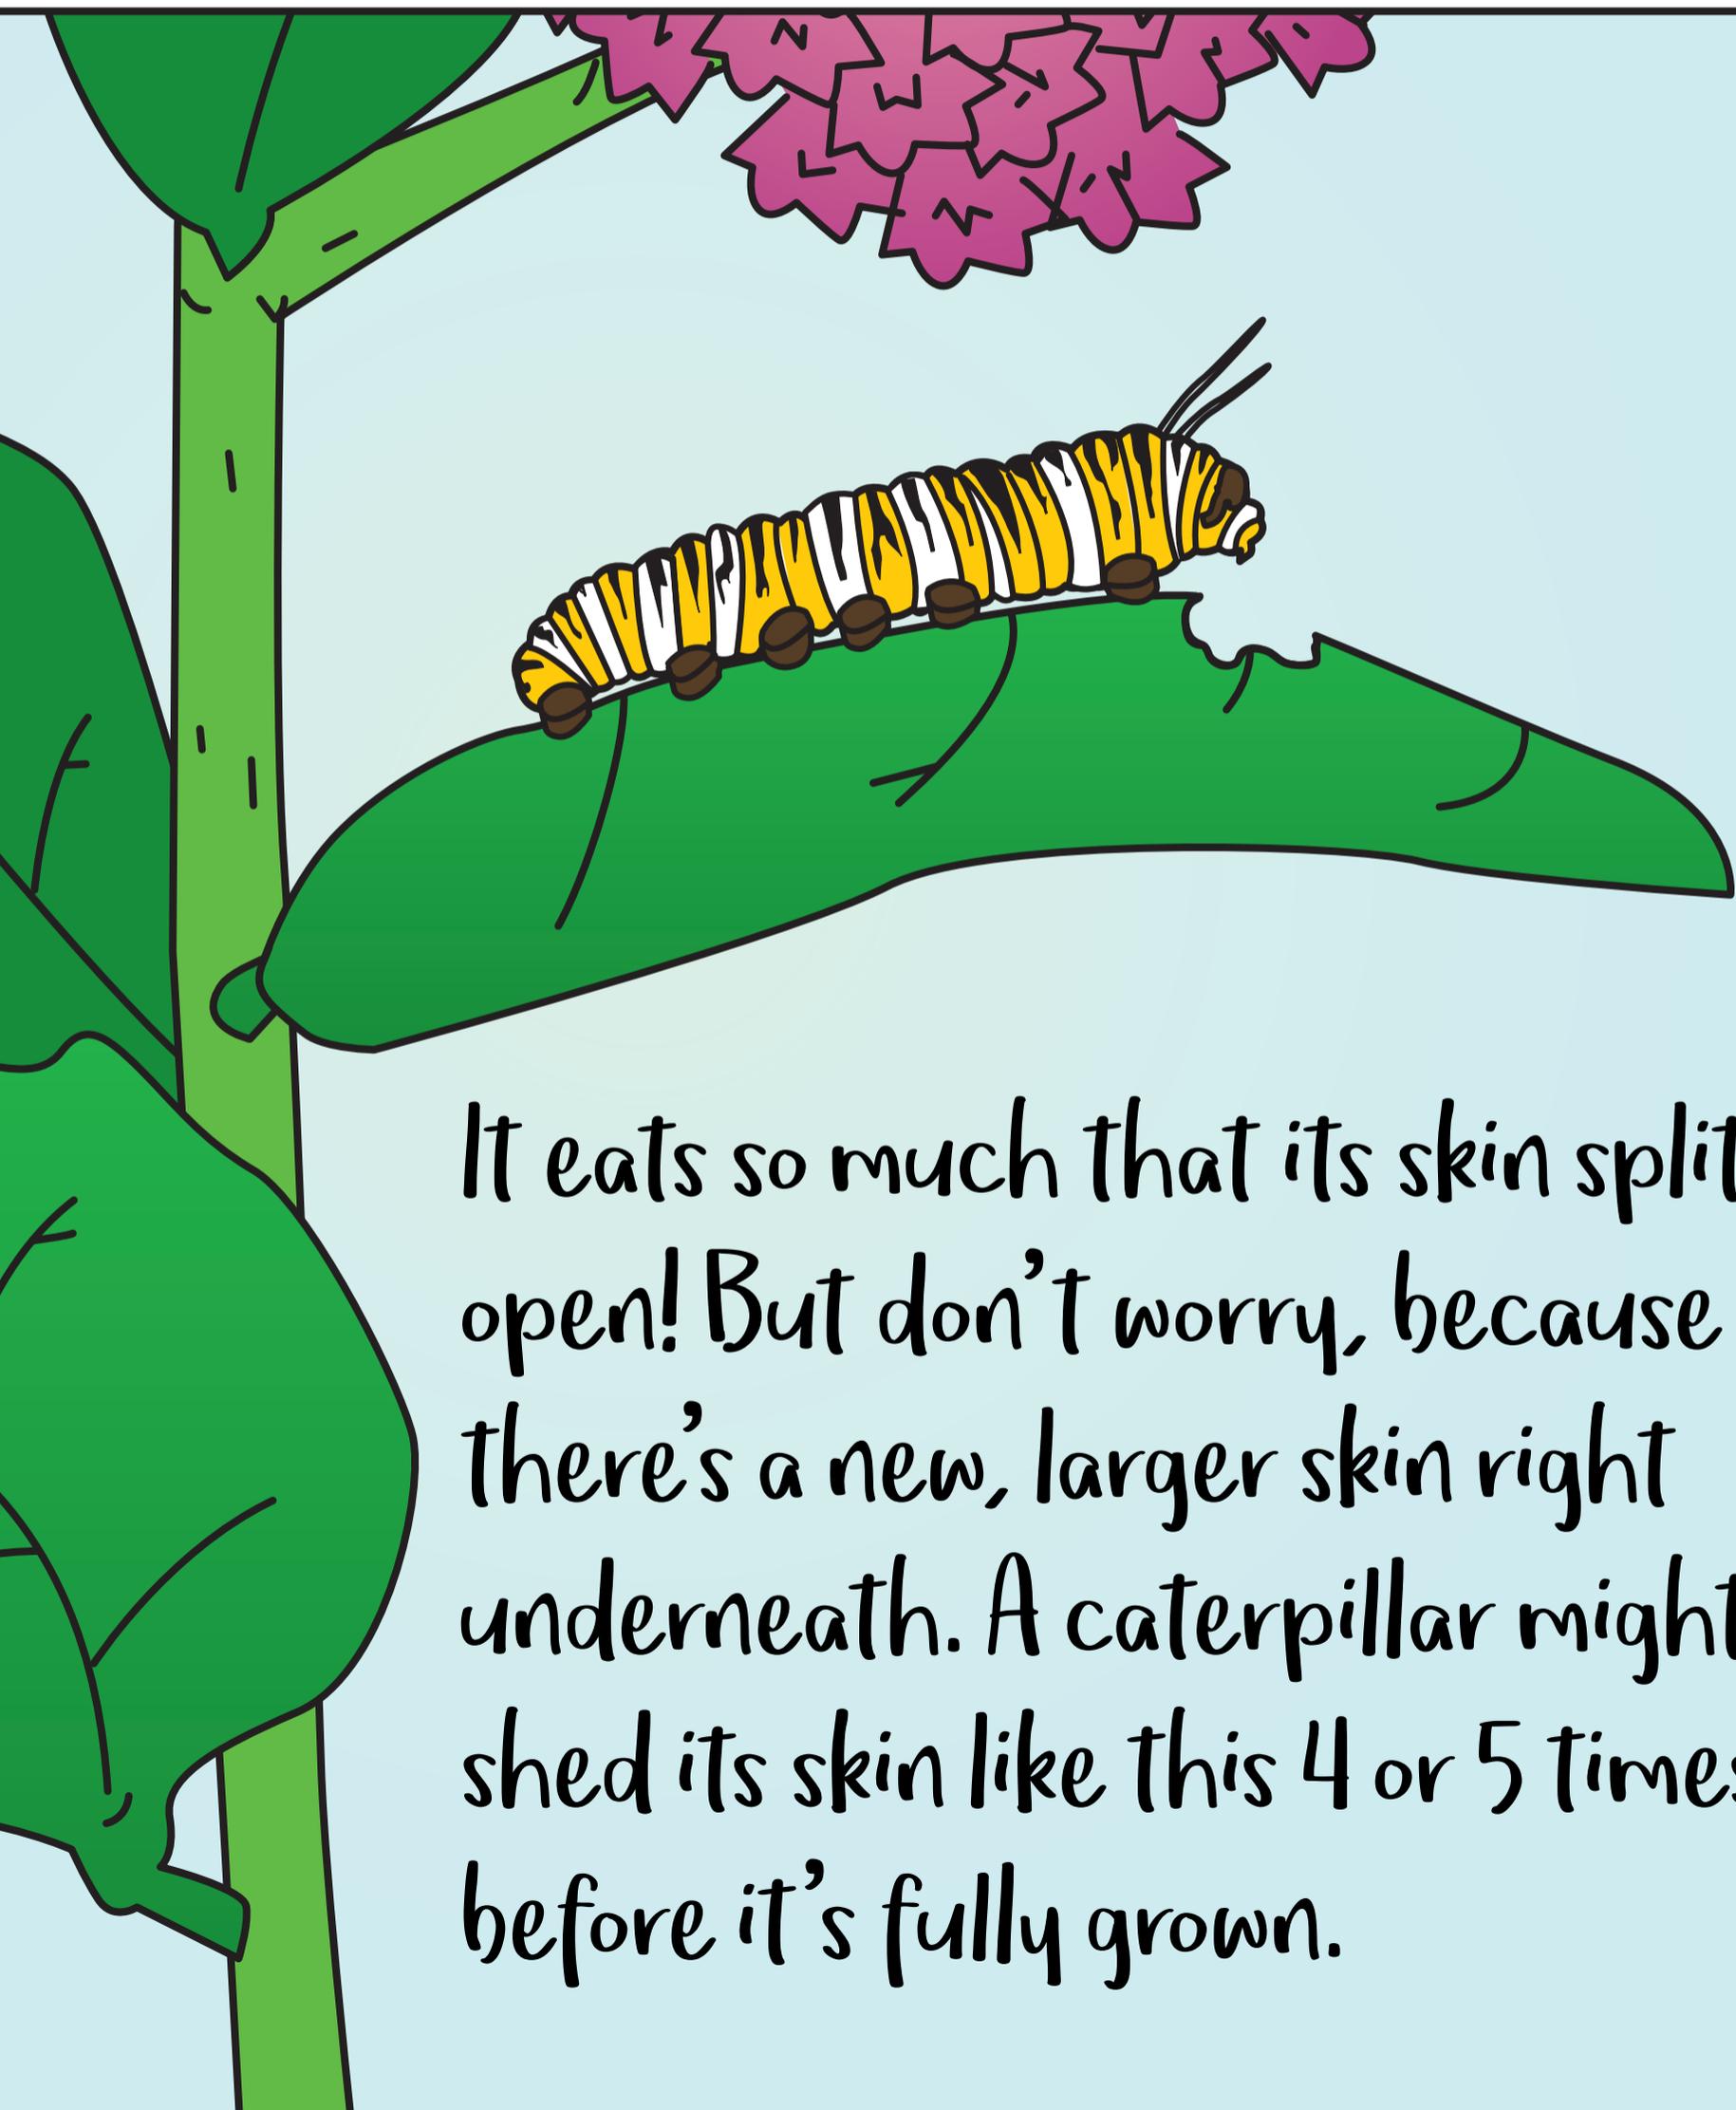

After many days, a tiny caterpillar eats its way out of its egg and starts munching all the leaves it can find.

3

## BIG CATERPILLAR

THIRD

It eats so much that its skin splits open! But don't worry, because there's a new, larger skin right underneath. A caterpillar might shed its skin like this 4 or 5 times before it's fully grown.

4

# CHRYSALIS

FOURTH

The full-grown caterpillar attaches itself to a twig or the underside of a leaf and hangs upside down.

A hard case called a chrysalis forms around the caterpillar to keep it safe as it slowly changes.

5

## NEW BUTTERFLY

FIFTH

After a long time, the chrysalis splits open and a new butterfly crawls out.

Its wings are wet, soft, and wrinkled, so the butterfly sits quietly, waiting for them to dry.

6

ADULT BUTTERFLY

SIXTH

When the butterfly's wings are strong enough to fly, it flutters up, up, and away to search for flowers and other butterflies.
